PROJECTS

Student Management System | Full Stack Java Project

- Developed a full stack web app using Java, Spring Boot, Hibernate, and MySQL.
- Implemented add, update, delete, and view (CRUD) features for student records.
- Created a responsive user interface using HTML, CSS, and JavaScript.
- Added login and authentication features to ensure secure user access.
- Learned end-to-end project development, from database design to UI integration.

Exam Archive | Full Stack Web Application

- Developed a web platform for students to view and download previous year question papers.
- Implemented secure login, role-based access, and smooth data management features.
- Built backend APIs for question paper uploads and PDF file handling.
- Designed a modern, responsive UI with focus on clean layout and user experience.
